

Announcement of additional token issuance for global roadshow

In order to further expand the global ecological layout, enhance platform liquidity and community vitality, we will officially launch a global roadshow and simultaneously issue additional tokens. This additional issuance will strictly follow the principles of transparency and fairness. The total amount of #FLY after the additional issuance is: 10,000,000,000,000,000,000, mainly used for ecological incentives, strategic cooperation and market expansion.

The global roadshow plan will cover key regions such as Asia Pacific, Europe, and North America. Through offline meetings, online AMAs, cooperative exchanges and other diversified forms, we will introduce the platform vision, technology development and application scenarios to the global community, and invite more partners to participate in ecological construction.

#FLY tokens will be gradually released to ensure market stability. The specific plan and timetable will be announced simultaneously on the official website and social media platforms. We promise that this additional issuance will not affect the team's lock-up ratio and the rights and interests of original investors.

Thank you for the continued support of the global community. We will uphold the concept of long-termism and open win-win to promote the sustainable development of the project.

Please pay attention to subsequent updates!
